

FURNITURE CLUB AT CRUISE SHIP INTERIORS EXPO

BOOTH 847, MIAMI, 6-7 JUNE 2023

Green Living – Sustainable Interior Solution

When CSIE –Cruise Ship Interiors Expo opens its doors in Miami on 6-7 June 2023, member companies of Furniture Club will present their know-how again at our joint booth 847. Reliability and high quality „Made in Germany“ have always been their strengths, just like their closeness to the customers' requirements. And they will demonstrate how they implement sustainability in marine interior solutions for green living onboard your ships.

Please use the QR code or this link www.furnitureclub.de/csie-miami-2023 to contact us. We are looking forward to meeting you!

Missal Objekt Licht GmbH & Co

We would like to introduce Missal Objekt Licht GmbH & Co. KG as a manufacturer of high-quality and exclusive lighting for the demanding hotel and cruise ship industry. As a producer of a wide range of luminaires we have specialized in contract interior lighting. More than 30 years of experience in this business and our almost complete "in house" manufacturing ensures consistently high quality "Made in Germany".

We develop our products using the latest lighting and manufacturing technology. The individual interior designer's requirements are implemented in a budget-oriented, fast and cost-effective manner.

Sustainability is already practiced during the development of our products by using resources efficiently, saving energy, reducing waste and promoting material recycling. More than 75% of the materials used can be already recycled. Environmental pollution is minimized as far as possible and environmentally friendly technologies are used when purchasing necessary resources.

On all continents and oceans, Missal products are reliably doing their job. Renowned hotel and gastronomy projects, numerous cruise ships and yachts, office buildings, shopping malls, nursing and public institutions of various kinds, receive the light moods they deserve through Missal products.

Welcome to Missal Objekt Licht!

Halbmond Teppichwerke GmbH

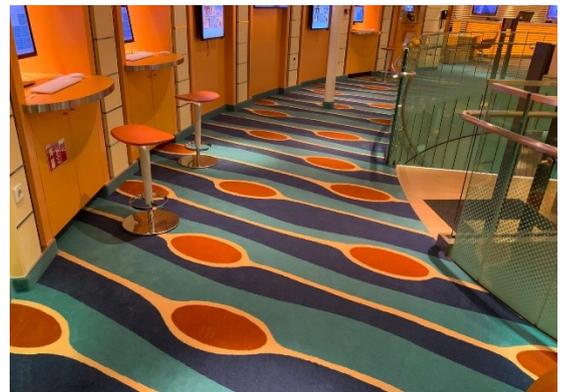

For over 140 years, the name Halbmond has been a synonym for quality by tradition. What began in 1880 with the founding of a weaving mill is today an efficient, innovative and international company with state-of-the-art production facilities. It is part of the company's philosophy to harmonise economically and ecologically responsible action. Resource-saving production and pollutant-free products are just as important as the principle of sustainability. The "Made in Germany" quality seal is both a responsibility and an honour for Halbmond at the same time.

One of the most important principles at Halbmond is to set no limits to creativity. In cooperation with interior designers, architects and owners, the competent design team develops optimal solutions in which the carpet design is precisely matched to the building plan. An optimal roll layout is guaranteed, waste is reduced. The delivery of precisely fitting carpet rolls facilitates an uncomplicated installation. The experienced Halbmond team provides support at every stage of a project.

Halbmond has developed a printable, high-grade wool quality especially for shipbuilding that meets the highest requirements. 80% hard-wearing New Zealand sheep's wool is combined with 20% polyamide to create a product with the best properties: durable, resilient, comfortable, stain-resistant and flame-retardant. What's more, this quality is made predominantly from naturally renewable raw materials in a resource-saving way.

GH Hotel Interior Group GmbH

We at the GH Hotel Interior Group support the shipping companies in equipping their ships in accordance with the globally applicable SOLAS guidelines. The use of IMO-certified materials is mandatory for us, the choice is that the furniture creates maximum comfort for the guests despite the strict specifications. For example, it is possible to produce a handmade armchair in accordance with the fire protection regulation. However, we manufacture the armchair in such a way that it complies with fire protection regulations and is comfortable at the same time. In this regard, our furniture has the following attributes:

1. Absolutely convenient and comfortable
2. In the design requested by the shipping company, tailored to the needs of the user
3. Particularly durable despite intensive use on a cruise ship
4. Adapted to ergonomic requirements
5. Production across the entire value chain using resource-saving production techniques and the use of renewable energy

We have the manufacturing know-how through our own fully integrated production and combine this with our cruise know-how. As our customer, you benefit from our expert knowledge and can be sure that we will support you from start to finish with the best solutions and ideas.

We observe the ESG criteria holistically in all steps.
