

FURNITURE CLUB MEMBERS OFFER ANTIMICROBIAL AND ANTIVIRAL SURFACES AND MATERIALS FOR INTERIOR DESIGN SOLUTIONS

Posted on LinkedIn 27. May 2021

Member companies of Furniture Club offer an amazing range of innovative antimicrobial and antiviral surfaces and materials. They can be applied for various interior solutions in private, commercial and public spaces and answer crucial hygiene questions raised by the corona pandemic and beyond.

Not only has the effect of sharpened awareness for healthier room climate and furniture long surpassed the distinction between health care interiors and others. Market experts consider antimicrobial surfaces as a general and lasting standard for interiors from now on. And the advantage of an easier and more sustainable cleaning of antimicrobial surfaces and materials means an additional benefit which is highly valued.

Furniture Club invites you to let yourself be convinced by our members' antimicrobial surfaces and materials in the successive presentation of their individual solutions for interiors.

Please visit us on Internet: www.furnitureclub.de. Furnishings of our member companies apply for furniture retail, furniture industry, hotel interiors, marine interiors, contract business, micro apartments.
