

FURNITURE CLUB MEMBERS OFFER SOLUTIONS FOR ANTIMICROBIAL AND ANTIVIRAL SURFACES:

microPLUS® BY PFLEIDERER GROUP

Posted on LinkedIn 22. June 2021

Consistent action for hygiene and health protection is especially required in highly frequented areas. The innovative microPLUS® surface from Pfleiderer features a protection concept that is unique on the market in this form: the surface counteracts germs and bacteria as well as enveloped viruses – including against SARS-CoV-2*!

microPLUS® is especially fast-acting with its antimicrobial effect working within seven hours in accordance with JIS Z 2801 / ISO 22196. Pfleiderer developed a solution using Sanitized Silver in microPLUS®, an additive that can be found in clothing, hygiene and care articles, etc.. It has been certified by independent testing institutes (Isega, Fraunhofer Institute, GfPS). The resulting combination is effective in combating germs and viruses, but it also poses no health risk to humans.

* antiviral effect against enveloped viruses within 24 hours in accordance with ISO 21702:2019, including HIV, SARS coronavirus 1 and 2 and West Nile virus.

Please visit us on Internet: www.furnitureclub.de. Pfleiderer furnishings apply for furniture retail, furniture industry, hotel interiors, marine interiors, contract business.
